IT Personnel Sourcing**

Flexibility, Competency, Efficiency

Flexibility is getting increasingly important for large organisations that want to be successful. Nobody can afford to lose productivity through IT problems. No organisation can afford that projects are being threatened by vacancies or that overstretched IT personnel can no longer implement tasks within the required timeframe.

Certain specialist knowledge is required temporarily, e.g. during the introduction phase of new hardware or software. To employ permanent staff would not be cost effective.

In short: [there are thousands of examples that show that swift access to suitable human resources is of a definite advantage.](#)

With the help of argocon, the smooth deployment of qualified interim IT specialists is the most efficient way.

argocon will match your enquiry against numerous profiles of [selected and established consultants](#), undertake the pre-selection and provide you with the people that will permute your IT projects in the best possible way.

This is done with the help of points of contact and distribution within the IT personnel sector. [argocon is an independent know-how agency.](#) We reduce the search mechanism and ensure that organisations can deploy IT specialists at short notice.

English-speaking IT Specialists promptly available

Do you have project inquiries in an English-speaking country and have been seeking IT specialists for months? Do projects not advance because urgently needed experts are not available on the market? Do the salary requirements of the needed experts not match with the budget of the project?

Then accept the help of a first-class recruiting partner! argocon supports you promptly and competently with regard to different requirements. In cooperation with our Indian office we usually find the experts who meet your profile within only 24 hours and place them at your disposal in situ.

Due to a continuous screening of candidates in India we have access to highly qualified personnel. The advantage you have: Access to different IT specialists, promptly and without bureaucracy. Even when it seems impossible to fill a vacancy we will provide the right personnel! The conditions to which we can provide you with English-speaking specialists are convincing.

If required we will also arrange residence permits and employment permits.

The personal profile of argocon freelance consultants:

- intelligent
- assertive
- focussed
- act as they see fit
- disciplined
- commercial understanding
- top know-how

Experience and Know-How guarantee ultimate Results

Trust is based on positive experiences. argocon enjoys the trust of clients from various sectors. Over many years, processes have been perfected. Michael Adams, founder of argocon, has led many large IT projects. Large organisations within sectors such as aviation, finance, automotive, mechanical engineering and telecommunication have been completed to clients' utmost satisfaction.

All clients confirm that the cooperation with the team of specialists around Michael Adams has paid dividends. IT projects entail many factors such as organisation, content and timeframe. That's why it makes sense to take the burden off one's own structures, concentrate on the core tasks and utilise the professional support of interim colleagues.

Be it **roll outs, QA or security projects**, all tasks, however varied, the „Boarders“ will master them! Besides specific expertise argocon consultants are also highly focussed and motivated.

argocon Consultants' Know-How:

- QA and test management
- project management
- project controlling
- software and configuration management for clients and server
- software development
- client/server architecture
- management and implementation of roll outs
- network and data communication

For every Client the right Specialist

Clients' satisfaction is the centre of our work. To service our clients' requirements adequately and in the shortest timeframe, argocon have developed a system of subsequent processes. Quality without structure is accidental.

A typical service order for a project usually requires 10 steps:

- 01.) Briefing by the client clarifying the current stage of the project, precise requirements and exact demands
- 02.) Points of contact and decision makers on both sides are determined, timeframe and budget clarified
- 03.) Job specification is drawn up for the recruitment process
- 04.) First Verification Phase: National and international database is being searched
- 05.) Second Verification Phase: Suitable specialists are contacted and screened (interview)
- 06.) Shortlist of suitable specialists is presented to the client
- 07.) Third Verification Phase: You have the option to carry out a telephone interview with the selected IT specialist. If required, a one-to-one interview on-site is arranged
- 08.) Contracts are drawn up
- 09.) We will accompany the project through every phase. argocon will assist you and the selected consultants with any queries, requests, disagreements or organisational issues
- 10.) A post completion summary is drawn up
